Re: *Application by SBC Communications Inc., et al. for Provision of In-Region, InterLATA Services in California*, WC Docket No. 02-306

Dear Ms. Dortch:

On behalf of SBC Communications Inc. ("SBC") and at the request of Commission staff, I am enclosing a CD containing a variety of files associated with Pacific Bell's performance measurement results through the month of October 2002. Specifically, the enclosed CD includes the following files:

1. A Word document called "PB_GoldIntroduction_Oct02.doc," which provides a summary of 12 months of CLEC aggregate results that are detailed within the Gold Report and describes the color coding conventions used in that report.
2. An Excel document called "PB_CopperPenny_Oct02.xls," which cross-references the numbered submeasures with their full descriptions.
3. An Excel document called "PB_SpecialHOMR_Oct02.xls," which contains the past six months of data.
4. An Excel document called "PB_Pyrite_Oct02.xls," which contains the Gold report information (without the charts), as well as the derived p-Value and the critical p-Value for aggregate CLEC results.
5. An Excel document called "PB_Tangerine_Oct02.xls," which contains statewide aggregate CLEC results for those measurements that are officially reported only by the four California Areas (North, Bay, LA, and South).

6. A folder called "Gold Pdf" which contains Acrobat documents (corresponding to each performance measure) reflecting 12 months of CLEC aggregate results per submeasure.
7. A folder called "Gold Excel" which contains Excel documents (corresponding to each performance measure) reflecting 12 months of CLEC aggregate results per submeasure.

Pursuant to its policy and practice of restating performance data where appropriate,^{*} Pacific Bell recently restated data for the following performance measures: PM 34 (resale and UNE POTS, May – September 2002); PM 15 (UNE Platform, July – September 2002); PM 1Sa (UNE Platform and UNE Loop 2-wire Digital Line Sharing, July and September 2002); PM 19 (UNE Loop 4 wire Digital 1.544mbps capable/HDSL, July – September 2002); PM 4 (LEWEDI LASR UNE Basic Port and Basic 8db Loop and LEWEDI LASR UNE Centrex Port and 8db Loop Port, August – September 2002); and PM 1 (Verigate, September 2002). Additional information regarding these restatements is available on the SBC/Pacific Bell website (<https://clec.sbc.com/clec>). The data included on the enclosed CD reflect these restatements.

In accordance with this Commission's Public Notice, **DA 02-2333** (Sept. 20, 2002), SBC is filing an original and two copies of this letter and its enclosure. Thank you for your assistance in this matter.

Yours truly,

Colin S. Stretch
